

# Master-Pin-Control

## Master-Pin-Control Basic

Pin system for Membrane Fixation - developed by Prof. Istvan Urban

The Master-Pin-Control is designed especially for the fixation of resorbable, non-resorbable and titanium reinforced membranes. The included pins consist of titanium alloy Grade 5 and have a groove which increases the surface of the pins. Due to the groove and a unique head-design, the pins can be loosened easily and safely which is especially important after a successful healing period. With their sharp tip and very stable shank, they can easily and precisely be inserted into dense cortical bone.

### At a glance

- No bending, no breakage - Safe Fixation of Membranes with Pins made of Titanium Alloy Grade 5
- Sharp tip and high stability of the pins allow for precise placement of the pins also in cortical bone and at an angle
- Easy Removal from the tray and placement of the pins due to the specially developed Pin-Holder
- Instruments for the placement of Bleeding Points for optimal healing conditions
